If you like Poker then you will love this game! I really enjoy it and I'm pretty bad on playing Poker lol. You can earn good money on challenging the Game and win on the table, there are 3 prizes to get so if you can't be number 1 then maybe number 3. If you risk too much you can lose really quick on this game and continue will be really hard because you need money to play and the day salary depends on how much houses or banks you own in a city.. it is fun playing a game that is built of multiplayer with no multiplayer options what so ever yay 10/10. HeXen is totally underestimated game but I think it really worths it!. For the time, it was really good. I enjoy playing it now. There's something so satisfying about fighting ninjas with comical weapons, kickflying across the dojo, and unlocking everything just by telling the master that you like sticky rice.. Gave me brain cancer. Get the bundle. It's a great game, but you gotta get the bundle.
